Dear Parents/Guardians of 1T, 1K and 1N,

The Scooter Safety Program is a fun filled 90 minute session dedicated to educating primary school children on how to use their scooters safely. Students taking part will learn the functions and importance of the helmet, elbow and knee pads. They will also learn new practical techniques such as braking correctly, turning and controlling falls to prevent potential injury, as well as important road safety information.

There is no cost to participate and students do not need to have their own scooter. A scooter and all other relevant material is provided courtesy of our sponsor micro® scooters, for use on the day. The focus of the program is to teach primary school children how to ride scooters safely. The program caters to children with experience, and those who have no experience riding a scooter.

If you would like your child to participate, please read the following information including the risk warning, filming and photography consent, and complete the permission form below.

For any additional enquiries please contact:
Charles Townsend
Charles.d.townsend@det.nsw.edu.au

Please remember that the riding of scooter and bikes etc in the playground before or after school, is prohibited.

RISK WARNING
Children participating in the Scooter Safety Program will be educated on how to use their scooters in the safest possible way. However, as scootering is a recreational activity involving the use of foot scooters on hard surfaces, there is an inherent risk of injury due to participants overbalancing, falling, crashing and/or colliding. By permitting your child to participate in the Scooter Safety Program, you acknowledge that although micro® scooters attempts to minimise any risk of personal injury within practical boundaries, accidents do happen and all physical activities carry the risk of personal injury. You further acknowledge that there is an inherent risk of injury, as described above, through participation in the Scooter Safety Program and that micro® scooters have warned you of the existence of it.

FILMING AND PHOTOGRAPHY CONSENT
During a session, students may be filmed and photographed for the purpose of the Scooter Safety Program and micro® scooters’ own records, training or promotional use. By enrolling your child in the Scooter Safety Program you give permission for photographic, audio or video footage of your child to be taken at our event for use in manners described as above.
